

HELUTHERM® 400

Single core, nickel conductor, stranded, for high temperature applications

CORPELIMA S.A.C.
Importadores y Líderes en Soluciones Eléctricas

TECHNICAL DATA

Single core

Temperature range	fixed -60°C to +400°C
Nominal voltage	AC U ₀ /U 300/500 V
Test voltage (spark test)	2000 V
Minimum bending radius	flexible 15x Outer-Ø fixed 7.5x Outer-Ø

CABLE STRUCTURE

- Ni conductor, stranded
- Core insulation: glass silk braid with heat-resistant impregnation
- Core identification by coloured helix, see table

PROPERTIES

- halogen-free

TESTS

- halogen-free acc. to DIN VDE 0482-754-1 / DIN EN 60754-1 / IEC 60754-1

APPLICATION

Single core with a wide temperature range; especially suited for use in the aviation and aerospace industry, in power stations, in engine design as well as in chemical, steel and metallurgical plants. For critical applications, for example involving mechanical stress, we recommend to contact us.

NOTES

- the conductor is metrically (mm²) constructed, AWG numbers are approximated, and are for reference only
- At temperatures above 200°C during the first commissioning, the impregnating varnish may degrade and leave only pure glass fibers remaining as insulation. This can be observed as evaporation.
